PROFILE

13+ years delivering scalable, cloud-native platforms across fintech, lending, healthcare, and edtech. Driving AI-first engineering through agentic workflows, LLM integrations, and MCP. Hands-on leader in Java, Spring Boot, Microservices, and AWS, leading teams of 20+ engineers.

EDUCATION

B.Tech, Computer Science

Bharat Institute of Technology, Meerut

U.P.T.U. | 2008 - 2012

- AWS Certified Solutions Architect
- Certified SAFe 6 Agilist

KEY SKILLS

Java / Spring Boot	●●●●●●●●●●
AWS Cloud	●●●●●●●●●○
Microservices	●●●●●●●●●●
Kafka / Messaging	●●●●●●●●○○
AI / LLM / Agentic	●●●●●●●○○○
DevOps / CI/CD	●●●●●●●●○○
SQL / Databases	●●●●●●●●●○

AWARDS

- **Total Experience & Learning Champion** - ZS Associates
- **Hero of the Moment & Ace of Initiative** - Bajaj Finserv
- **Star Performer of the Month** - Infosys
- **Star Performer & Star of the Month** - TCS

PROFESSIONAL EXPERIENCE

Engineering Manager | **Rahi Platform Technologies, Pune** | **Nov 2025 - Present**

Leading development of a cloud-native Loan Origination Platform for banks, NBFCs, and fintechs - covering the full lifecycle from application and KYC through underwriting, decisioning, and disbursal.

- Leading a team of 20+ engineers across frontend, backend, and platform, driving end-to-end delivery from architecture to production
- Designing microservices architecture, decomposing the loan lifecycle into independently deployable services with event-driven communication via Kafka and SQS
- Integrating third-party APIs for KYC (UIDAI, CKYC), credit bureaus (CIBIL, Experian), and e-sign providers with retry, idempotency, and audit logging
- Driving AI-first initiatives - evaluating agentic AI usecases for Loan Origination System.
- Establishing engineering standards, leading Agile/SAFe ceremonies, and instituting code review practices across the team
- Designed and implemented scalable event-driven architecture for loan workflows enabling reliable async processing and portfolio-specific configurable workflows
- Architected agentic LOS use cases from scratch — KYC OCR, speech-to-text, and bank statement analysis — using AWS Bedrock

Senior Lead, Engineering | **ZS Associates, Pune** | **Oct 2021 - Nov 2025**

Owned backend engineering for ZAIDYN IC Ops, a cloud-based SaaS platform automating incentive compensation for pharmaceutical sales teams across global healthcare clients.

- Managed 20+ engineers across 3 scrum teams in 2 geographies (US and India), owning end-to-end delivery of services impacting a large user base across client organizations
- Reduced sprint duration from 2 weeks to 1 week, increasing delivery velocity and tightening feedback loops
- Drove DevOps improvements that significantly reduced deployment time and enhanced CI/CD pipeline reliability
- Led infrastructure cost optimization initiatives, reducing cloud spend while improving system reliability
- Mentored engineers across levels through regular 1:1s, drove hiring, and built a culture of ownership and career growth

Technical Lead | **Bajaj Finserv Direct Ltd., Pune** | **Jan 2020 - Oct 2021**

Led design and development of high-throughput payment, rewards, and compliance systems for Finserv MARKETS.

- Led a team of 6+ engineers, owning technical design and delivery of payment and rewards microservices handling high transaction volumes
- Delivered 6 major product integrations - BBPS bill payments, UPI, multi-gateway payment abstraction (PayU and Razorpay), real-time rewards engine, e-sign, and webhook infrastructure
- Collaborated with Product, QA, and InfoSec to ensure secure, RBI-compliant delivery of all payment APIs

Technology Analyst | **Infosys, Pune** | **Aug 2018 - Jan 2020**

- Developed Java backend services for Citibank's TRIMS, an enterprise trade finance platform for global banking clients managing trade instruments from registration through settlement

Founder | **ClerisyHub (Startup), Lucknow** | **Apr 2017 - Aug 2018**

- Founded an ed-tech startup and built a multi-platform ecosystem (web, Android, desktop) from scratch - owned full product lifecycle from ideation through deployment

System Engineer | **TCS, Chennai** | **Jan 2013 - Apr 2017**

- Developed middleware integration for Citibank's Global Common platform, consolidating country-specific banking apps into a unified global codebase deployed across multiple countries
- Built automated testing frameworks for Nielsen, enabling concurrent testing alongside active development and reducing QA cycle time
