PROFILE

13+ years delivering scalable, cloud-native platforms across fintech, lending, healthcare, and edtech. Driving AI-first engineering through agentic workflows, LLM integrations, and MCP. Hands-on leader in Java, Spring Boot, Microservices, and AWS, leading teams of 20+ engineers.

EDUCATION

B.Tech, Computer Science

Bharat Institute of Technology, Meerut
U.P.T.U. | 2008 - 2012

- AWS Certified Solutions Architect
- Certified SAFe 6 Agilist

KEY SKILLS

- **Java / Spring Boot**
- **AWS Cloud**
- **Microservices**
- **Kafka / Messaging**
- **AI / LLM / Agentic**
- **DevOps / CI/CD**
- **SQL / Databases**

AWARDS

- **Total Experience & Learning Champion** - ZS Associates
- **Hero of the Moment & Ace of Initiative** - Bajaj Finserv
- **Star Performer of the Month** - Infosys
- **Star Performer & Star of the Month** - TCS

PROFESSIONAL EXPERIENCE

Engineering Manager | Rahi Platform Technologies, Pune | Nov 2025 - Present

Leading development of a cloud-native Loan Origination Platform for banks, NBFCs, and fintechs - covering the full lifecycle from application and KYC through underwriting, decisioning, and disbursal.

- Leading a team of 20+ engineers across frontend, backend, and platform, driving end-to-end delivery from architecture to production
- Designing microservices architecture, decomposing the loan lifecycle into independently deployable services with event-driven communication via Kafka and SQS
- Integrating third-party APIs for KYC (UIDAI, CKYC), credit bureaus (CIBIL, Experian), and e-sign providers with retry, idempotency, and audit logging
- Driving AI-first initiatives - evaluating LLM-based document extraction and agentic workflows to accelerate underwriting turnaround
- Establishing engineering standards, leading Agile/SAFe ceremonies, and instituting code review practices across the team

Senior Lead, Engineering | ZS Associates, Pune | Oct 2021 - Nov 2025

Owned backend engineering for ZAIDYN IC Ops, a cloud-based SaaS platform automating incentive compensation for pharmaceutical sales teams across global healthcare clients.

- Managed 20+ engineers across 3 scrum teams in 2 geographies (US and India), owning end-to-end delivery of services impacting a large user base across client organizations
- Reduced sprint duration from 2 weeks to 1 week, increasing delivery velocity and tightening feedback loops
- Drove DevOps improvements that significantly reduced deployment time and enhanced CI/CD pipeline reliability
- Led infrastructure cost optimization initiatives, reducing cloud spend while improving system reliability
- Mentored engineers across levels through regular 1:1s, drove hiring, and built a culture of ownership and career growth

Technical Lead | Bajaj Finserv Direct Ltd., Pune | Jan 2020 - Oct 2021

Led design and development of high-throughput payment, rewards, and compliance systems for Finserv MARKETS.

- Led a team of 6+ engineers, owning technical design and delivery of payment and rewards microservices handling high transaction volumes
- Delivered 6 major product integrations - BBPS bill payments, UPI, multi-gateway payment abstraction (PayU and Razorpay), real-time rewards engine, e-sign, and webhook infrastructure
- Collaborated with Product, QA, and InfoSec to ensure secure, RBI-compliant delivery of all payment APIs

Technology Analyst | Infosys, Pune | Aug 2018 - Jan 2020

- Developed Java backend services for Citibank's TRIMS, an enterprise trade finance platform for global banking clients managing trade instruments from registration through settlement

Founder | ClerisyHub (Startup), Lucknow | Apr 2017 - Aug 2018

- Founded an ed-tech startup and built a multi-platform ecosystem (web, Android, desktop) from scratch - owned full product lifecycle from ideation through deployment

System Engineer | **TCS, Chennai** | **Jan 2013 - Apr 2017**

- Developed middleware integration for Citibank's Global Common platform, consolidating country-specific banking apps into a unified global codebase deployed across multiple countries
- Built automated testing frameworks for Nielsen, enabling concurrent testing alongside active development and reducing QA cycle time
